

Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number.

REISSUE APPLICATION DECLARATION BY THE INVENTOR

Docket Number (Optional)

00100.99.1035

I hereby declare that:

Each inventor's residence, mailing address and citizenship are stated below next to their name.

I believe the inventors named below to be the original and first inventor(s) of the subject matter which is described and claimed in patent number 6,356,704, granted March 12, 2002 and for which a reissue patent is sought on the invention entitled _____,Method and Apparatus for Detecting Protection of Audio and Video Signals,

the specification of which

☐ is attached hereto.☒ was filed on March 12, 2004 as reissue application number 10/800,358and was amended on _____
(If applicable)

I have reviewed and understand the contents of the above-identified specification, including the claims, as amended by any amendment referred to above.

I acknowledge the duty to disclose information which is material to patentability as defined in 37 CFR 1.56.

☐ I hereby claim foreign priority benefits under 35 U.S.C. 119(a)-(d) or (f), or 365(b). Attached is form PTO/SB/02B (or equivalent) listing the foreign applications.

I verily believe the original patent to be wholly or partly inoperative or invalid, for the reasons described below. (Check all boxes that apply.)

☐ by reason of a defective specification or drawing.☒ by reason of the patentee claiming more or less than he had the right to claim in the patent.☐ by reason of other errors.

At least one error upon which reissue is based is described below.

An error arose due to the failure of me and my attorney to appreciate the full scope of the invention and as such broadening claims (and narrowing claims) are being presented.

Proposed new independent claim 11 is a method claim corresponding to operations set forth in allowed independent apparatus claims, such as issued claim 4 and issued claim 10 but does not include reference to a video decoder.

New claim 12 is believed to further narrow new claim 11 by adding previously unclaimed subject matter relating to the storing of the digital video in memory wherein the stored digital video in memory does not include the embedded data access parameter. The additional dependent claims 13 and 14 are believed to further narrow the new claim 11.

New independent claim 15 is a broadening apparatus claim not previously presented which is broadening in at least that it claims at least one of a central processing unit and another computer element. In addition it is believed to be narrower in at least that it claims memory coupled to the video decoder for storing the digital video when the stored digital video does not include the data access

[Page 1 of 3]

This collection of information is required by 37 CFR 1.175. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.14. This collection is estimated to take 30 minutes to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.

If you need assistance in completing the form, call 1-800-PTO-9199 and select option 2.

(CONT.)

New Claim 16 is a method claim directed to another aspect of the invention not believed to be previously presented for examination. This claim is believed to be broadening in at least that it is not directed to the operation of a video decoder and instead may be carried out by a central processing unit, computer element, peripheral device or other suitable structure.

Dependent claims 17 and 18 are believed to further narrow new independent claim 16.

New claim 19 is a new system claim directed to an aspect of the invention not previously claimed which includes, memory containing stored digital video data obtained from an analog video signal wherein the stored digital video data does not include the embedded data access parameter from the analog video signal and at least one of a CPU, computer element and peripheral device that is operative to process stored digital video data that does not include an embedded access parameter from an analog video signal, in accordance with a received indication of data access restriction.

Dependent claims 20 and 21 are believed to further narrow new independent claim 19.
